Python Full Stack Developer

I want to make use of my potential in a correct and in the best suitable way for the growth and benefit of both the user and me. I am ready to take up any challenge that comes along my way to success.

EDUCATION

Institude	Course	Year of passing	CGPA/Percentage
Sanjay Ghodawat University of Engineering	Computer Science(AIML)	B-Tech (2021-2024)	7.1
Dr. D. Y. Patil Polytechnic, Kolhapur	Computer Science	Diploma (2019-2021)	81.80

SKILLS

Languages: Python, HTML, CSS, SQL, JavaScript (React.js)

Framework: Bootstrap,Django,DRF(Django Rest Framework)

Libraries: Scikit-learn, NumPy, Pandas, Keras, NLTK

APIs: REST API

Tools: VS Code, Jupyter Notebook, PyCharm, Git, GitBash, Postman, MySQL, MS Office

Soft Skills: Time Management, Project Management, Problem-Solving, Communication, Willingness to Learn New Tools & Technologies

INTERNSHIP EXPERIENCE

- **Python Full Stack Developer (Creazione Software, Pune (20-06-2024 to 20-05-2025))**
  - Developed and deployed web applications using Django, Django REST Framework (DRF).
  - Gained hands-on experience in Python, HTML, CSS, Bootstrap, JavaScript, and MySQL.
  - Built and integrated RESTful APIs for seamless backend communication.
  - Improved backend development skills, database management, and API integration.

- **Python Machine Learning (BrightGeeks technologies Pvt. Ltd. (01/2024 - 06/2024))**

  I Completed Internship in Machine Learning with Project. In machine learning projects, the choice of technology depends on various factors, but some commonly used technologies include Python, TensorFlow, scikit-learn, these technologies provide powerful frameworks and libraries for data manipulation, analysis, and building and training machine learning models scikit-learn offers a wide range of machine learning algorithms and tools.

- **Machine Learning-python(IGAP Technology Pvt. Ltd. ,Kolhapur (5th Jan 2023 – 4th Feb 2023))**

  I am proud to say that I have worked as a Machine Learning Engineering Intern at iGAP Technologies Pvt. Ltd., a software development company. This department is responsible for designing, coding, and testing software solutions.

CERTIFICATES

Python Machine Learning [Certificate]

Linux System Administration [Certificate]

Foundation of Cloud IoT Edge ML [Certificate]

PERSONAL PROJECT

- **Portfolio Website (06/2025-07/2025)- Link**
  Tech Stack: HTML, CSS, JavaScript
  - Designed and developed a portfolio website to showcase projects, skills, and achievements.
  - Implemented a modern responsive UI with animations and interactive sections.
  - Added sections like About, Skills, Projects, Contact for better presentation.
  - Focused on user-friendly navigation and clean design for professional branding.

- **House Price Prediction (01/2023 - 02/2023)- Link**

  House price prediction is a data-driven project that utilizes machine learning techniques to forecast the value of residential properties. This project involves the analysis of various features such as location, size, number of bedrooms, and other relevant factors that influence housing prices. By leveraging historical data and employing regression models or other predictive algorithms, the system aims to provide accurate estimates for property values. The goal is to assist real estate professionals, homeowners, and potential buyers in making informed decisions about pricing and investment.

- **Driver Drowniess Detection System (08/2023 – 06/2024)- Link**

  A Drowsiness Detection System is a project designed to enhance road safety by monitoring the driver's level of alertness and intervening when signs of drowsiness are detected. The system typically utilizes a combination of sensors, such as cameras and/or infrared sensors, to analyze the driver's behavior and facial expressions in real-time.
